TITLE: Third CWA-SDWA Toolkit Webinar: Using TMDLs and NPDES Permits to Protect and Preserve Drinking Water Quality

DESCRIPTION: This is the third of four webinars in a series that is being conducted through a joint effort of the Association of Clean Water Administrators (ACWA), the Ground Water Protection Council (GWPC), and the Association of State Drinking Water Administrators (ASDWA). This third CWA-SDWA Toolkit webinar will provide state, interstate, tribal, and federal water program managers with more detailed information about Sections 3 – 4 of the toolkit, on using Total Maximum Daily Loads (TMDLs) and National Pollutant Discharge Elimination System (NPDES) Permits to protect drinking water sources and work across programs to achieve mutual goals. The CWA-SDWA Toolkit entitled, "[Opportunities to Protect Drinking Water Sources and Advance Watershed Goals through the Clean Water Act: A Toolkit for State, Interstate, Tribal, and Federal Water Program Managers](#)," was developed by a workgroup that included many state, EPA Headquarters, and EPA Regional representatives from clean water, drinking water, and ground water programs. During the last webinar, speakers will share information and state examples from Section 5 of the toolkit on using Nonpoint Source and Clean Water Act 319 Programs.
